USER FRIENDLY TEMPLATES

User friendly templates provide simple configuration changes and make it easy for you to adjust the information displayed in each field. Select the Information YOU want to DISPLAY!

Want to make a change that better suits your management or crews needs? No problem, set the template, then select the events and settings you want to display.

ON SCREEN DRIVE-THRU

The On Screen Drive-Thru provides immediate feedback to management and crewmembers of how many cars are in the drive-thru and how long they have been waiting.

Multi-Color Targeting indicates if Total time goals are being met based on Store Parameters set in the timer by the user or by corporate default programming.

This feature can be easily enabled/disabled by the user.
